

Description

Proteq HD is a heavy duty, bitumen and mineral fortified board designed to give excellent protection to Xeric, or similar waterproofing membranes. It is designed to provide high strength and affords protection against mechanical damage, abrasive backfills and impact. The fibreglass matting incorporated improves flexural strength.

Advantages:

- Non-compressive, suitable of load bearing foundations.
- Resistant to salts and sulphates.
- Rot proof
- Non-toxic.

Application:

- Permanent protection.
- Horizontal and vertical use.

Installation:

The boards should be butt jointed and supported during backfilling. Use with Xeric double-sided bitumen tape.

Technical Data:

Thickness	3mm
Puncture strength	312N
Water absorption	10% max
Bitumen % by weight	65% min
Weight	Approx 10kg

Supply

2mx1m boards.
Special cut sizes available to order.

Storage

Outside at a normal temperature and should be kept flat.

Health and Safety

There are no known health hazards associated with Proteq HD in normal use. Refer to the Materials Safety Data Sheet.
